

xLocker2 System

xLocker2 is a unique steel personal storage solution for flexible, agile environments or end-of-journey storage for commuters and mobile workers.

xLocker2 can be customised with a choice of colours and finishes, optional perforations, laminate or veneered doors and various locking systems. Components can be reused and reconfigured to create different layouts whilst steel construction brings strength, durability, and design flexibility to provide a locker system to meet scalable requirements as needs change with time.
