

Project: 60 Margaret Street

Planex, Metra and Mirvac partnered to deliver steel locker storage with secure single card access for both tenants and End-of-Trip Facilities at 60 Margaret Street.

60 Margaret Street

Set in the heart of Sydney, 60 Margaret Street is a striking model of 80's modernist architecture that is busy by day and vibrant at night. Providing the best of corporate, retail and transport options available, the building features majestic views of Wynyard Park and the surrounding CBD cityscape. Designed by Gray Puksand to promote wellness and human connection, 60 Margaret Street boasts an abundance of lifestyle amenities including world-class End-of-Trip Facilities with bike racks, multiple storage lockers and secure parking for 142 undercover on-site parking bays.

The Brief

The building required an integrated solution that combined durable storage with secure access functionality. Planex's xLocker2 system was specified to provide end-of-trip storage for both tenants and commuters. Locker doors were customised with a selection of monochromatic powder coat finishes in white, grey and black, and acoustic rated Linea perforations were integrated on locker doors to reduce interior noise.

Metra Australia partnered with Planex and Mirvac to extend existing HID® access control security to enhance the quality working environment and increase productivity and wellbeing. Integrating card technology with storage allowed end-users to be able to assign a locker that could be accessed from central reader terminals located within the locker banks. Secure and convenient, Metra's technology offered the client many advantages and configurations to suit a number of requirements. The system meant tenants were able to use a single card for tenancy and End-of-Trip Facilities (EOTF), including hiring and opening of secure lockers and use of bike racks.

Project Milestones

- : End-of-Trip Facilities with secure bike racks and durable steel lockers
- : Metra HID® access control security with single card access
- : Powder coated locker doors feature acoustic rated punch pattern perforations
- : A new joining system enables fast locker assembly and the ability to reconfigure and reuse
- : Provides better flexibility than traditional locker storage
- : Eliminated costs associated with resetting and managing combination locks
- : Improved convenience and security with alarmed lockers
- : Collaboration between world-class manufacturers Planex and Metra and Mirvac

For The Evolving Workplace

The only Australian locker and sliding door cabinet to receive AFRDI Blue & Green Tick Level A Platinum certification, xLocker2 and Linea incorporate sustainability from concept to manufacture. Made in Melbourne using over 95% locally sourced materials, xLocker2 is manufactured in an ISO14001 and ISO9001 certified production facility from 100% recyclable BlueScope steel, is designed for disassembly and VOC-Free.

Planex

Specialists in adaptive steel furniture, Planex design and manufacture steel storage and locker systems.
