## Virtu

Lateral drawer cabinet in blaze blue

Virtu is a versatile storage range characterised by clean lines, strength and durability - simple designs that make an impact.

Virtu gives you the control to transform filing systems from a practical necessity relegated to administrative back rooms, into a vital and integral part of contemporary offices.

A neglected feature in work places, filing systems have long been generic and dull in design and failed to acknowledge the desire for aesthetics in this area.

Virtu illustrates the versatility of a quality storage system. The use of colour gives a designer the tools to add their own sense of individuality and character into every office environment.

Working with steel is now more than just 'unloading boxes on a floor plan', Virtu works harder to stamp your design mark with dynamism and individuality.

Set the scene with Virtu: Designed and manufactured in Australia.

Environmental Certification

Planex’s state-of-the-art manufacturing facility in Melbourne operates under Environmental certification ISO14001 and Quality Assurance certification ISO9001

Designed and manufactured in Australia by Planex

Storage with a conscience

About Planex

Since 1972, we have pioneered sustainable storage solutions in Australia.  
  
Planex began providing sustainable storage solutions in 1972 - before sustainability became fashionable. We are an Australian, furniture design and manufacturing business driven to create highly considered, useful and innovative products that preserve the environment.

Our storage is designed for flexible, activity-based spaces across commercial, education, sports, hospitality and residential markets.

Design Philosophy

Our products are designed in Melbourne by us, for you.  
  
We design highly-resolved, minimalist storage, unburdened by non-essential details. Our design philosophy extends to our environmental credentials: we believe that our products must be versatile, original and durable. Our storage is designed to last years; to be reused, reconfigured and recycled. We call it ‘built-out obsolescence’.

Manufacturing

We manufacture custom products in Melbourne using state-of-the art metal prototyping and production equipment. We are committed to reducing the impact of our manufacturing processes on the environment. As a sustainable manufacturer, our products contribute maximum points to Green Star ratings.  
  
With our modern, Australian-based factory, we’re uniquely placed to customise, manufacture and deliver new products to sites nationally.
